

Your Friday Water Report

This Week's Topic:

Project Completions

Freshwater storage tanks are used to even out the daily or hourly fluctuations in water demand, to maintain adequate water pressure, and to be a backup supply in case of fresh water treatment plant problems. The tanks have been in place for 3 to 4 decades.

The rehabilitation of the tank near Luna Community College (3.5 million gal.) has just been completed. The tank is now being refilled. A 30,000 gal. backup tank at the Cabin Site near Montezuma was completed allowing rehabilitation of the 5 million gal. tank there to proceed. A 500,000 gal. blending tank has been completed, enabling more effective use of the brackish water from Taylor Well #7.

Daily Averages for 01/06 – 01/12

Gallinas River Flow meter iced

This week in 2015 was – meter iced

Avg. River Diversions 2.08 Mgd*

Yr. to date 23 Mg*; year max. 908 Mg*

Draw from Wells 0.00 Mgd

This week in 2015 was 0.00 Mgd

Fresh Water Demand 1.82 Mgd

This week in 2015 was 1.59 Mgd

As of 01/12/16:

Bradner Storage 0.00 Mg

Peterson Storage 63.13 Mg

Reservoir Storage 37.1%

Las Vegas Airport Rainfall 0.11"

Snowpack Depth 43 inches

Snowpack Water Equiv. 11.2 inches

This date in 2015 was 3.9 inches

This date median is 7.0 inches

*Mgd = Million gal. per day, Mg = million gal.

Did You Know?

The ten-year closing of the city's old landfill near the Behavioral Health Institute has finally been completed, meeting the stringent requirements of the NM Environment Department.
